

Manufacturer of Custom Windows and Doors

Est. 2014 Revenue- \$18.9 Million

Est. 2014 EBITDA- \$2.13 Million

The Company is the largest, most innovative designer and manufacturer of distinctive PVC tilt and turn windows and doors intended primarily for the North American residential building and commercial/industrial construction sectors. The Company completes installations throughout North America and countries around the globe. The Company's operational niche lies in its ability to generate custom products, designed to customer specifications. This niche allows the Company to generally outpace the industry during hard economic times, as seen industry-wide from 2007 to 2009. With the Company's vast array of products combined with the wide range of colors, glass types and other accessories, the possibilities for customization are virtually endless.

From residential tilt and turn windows, to doors and shutters, to commercial curtain walls, the Company manufactures superior quality products that deliver unmatched performance to ensure complete customer satisfaction.

The Company is one of very few companies that owns and operated its own foiling line, enabling the Company to be more flexible when it comes to providing quality colors for its products. The Company utilizes RENOLT and Hornschuch foils.

European Technology - Made in North America

The Company, a private Canadian C-Corporation (Ltd.), was founded in 1993. In 1998, the name was changed to better reflect the advanced European technology embraced by the company.

Manufacturer of Custom Windows and Doors

Est. 2014 Revenue- \$18.9 Million

Est. 2014 EBITDA- \$2.13 Million

Window Series Offered

- European-style tilt and turn windows – These windows are manufactured from uPVC profiles (REHAU’s Brilliant Window System) and are adapted to North American building technologies and designs. Window highlights include ROTO NT hardware, locally sourced IG units, double or triple panes, a low-e coating and argon fill.
- North American style casement windows - These windows are also manufactured from uPVC profiles (REHAU’s 1400 Series). Window highlights include ROTO stainless steel casement hardware, PFG glass (PFG Glass Industries Ltd, a Supplier in Langley, BC.), dual or triple panes, low-e coating and argon fill.

Door Types Offered

- Various types, including in-swing, out-swing French doors, tilt and turn doors and tilt and glide doors. All of these doors are based on the REHAU Brilliant Design vinyl profiles and feature ROTO hardware.

Curtain Wall System

- The Company is a licensed fabricator for the REHAU Polytec 50 curtain wall system. This system is a unique, high performance system that can be used both as a full-fledged curtain wall for use in high-rise buildings or as a window wall system. The system consists of a structural steel core, with external aluminum pressure plates and cover caps, completely isolated from the steel structure, and internal vinyl caps. The curtain wall system is a new addition and to REHAU and EuroLine is the only fabricator that has completed product orders thus far.
