REVOLUTIONARY P.O.S POLYMER FILM MEDIA

The patented Polymer Transaction Media, known and referred to as Enviro-Media™ is a new product that will replace POS paper rolls used in cash registers, automatic teller machines (ATMs), and lottery ticket machines.

Enviro-Media™ receipt rolls are made from plastics, which are more energy efficient to manufacture than paper and which leave a much smaller “carbon footprint” than paper products.

The plastics-based receipt tape weighs less, and thus reduces transportation costs and energy use associated with transport. Plastics-based tape is thinner than paper, so more will fit on a roll that weighs the same size, increasing efficiency and lowering costs. It is also recyclable, and plastics manufacturing and recycling are far more ecologically friendlier processes than paper manufacture and recycling.

- **Disruptive Technology:** Paradigm shift in the way the move was from paper bags to plastic.
- **Patented:** Printable, recyclable thermoplastic media patented in 18 countries.
- **100% Recyclable:** Becomes part of the polymer stream instead of a contaminant.
- **100% Plastic:** No adverse impact on global forestry.
- **Less Energy Consumption:** Less energy used in the manufacturing and recycling processes.
- **IBM Partnership:** IBM SureMark printer will provide full support for Enviro-Media™.
- **Advantages Over Paper:**
 - Reduced freight costs - 50% reduction in weight means less transportation and storage costs.
 - Fewer roll changes, 40% increase in roll length for the same size roll.
 - Security - cannot be duplicated in a photo copy machine.
 - 75% less energy consumed in manufacturing.
 - 90% less energy consumed in recycling.
 - 50 times more water contaminants in paper manufacturing process than in making of plastic films.

Since 2000, the development, testing and manufacturing of the product have been our client's main focus. A limited marketing effort has been put forward to date. Available for sale are the patent, trademark, and manufacturing rights. Manufacturing is currently provided by outside sub-contractors.
